

**MRS. BOHNETT
AT REST**

The sudden death of Mrs. Jos. Bohnett on Tuesday morning came as a terrible shock to the entire community as she had been in Campbell the day before and seemed apparently in good health. Mr. Bohnett and Miss Grace were the only members of the family present at the time of her death. She awakened her daughter, saying she could not breathe, and soon after passed away.

Mrs. Tamer Barker Bohnett was born near Campbell more than 65 years ago, her parents being among the early pioneers. October 4, 1874, she was married to Joseph Bohnett and had lived just southeast of town since that time. There were born to them eleven children, all of whom are living and attended the funeral. They are George, Enos, Lewis D., Ralph C., William Calvin, Floyd O. and Karl U. Bohnett, Mrs. Mary A. Evans, Mrs. Eva Pearl Powers, Mrs. Hattie A. Gardner and Misses Belle Grace and Lois G. Bohnett.

"Mother" Bohnett was one of the most lovable mothers of the community, her maternal love and solicitude extending to all the young people with whom she was naturally brought in contact by her children's associations. Her home was always a most hospitable rendezvous with a plentiful supply of good things to eat. There was her life which was one of unbounded love and service for others, and it was her greatest joy to have her children with her in family reunions.

For a number of years she has been a most faithful and enthusiastic worker in the local grange and in the Pomona Grange, in both of which she was held in the highest esteem.

The funeral was held from the residence on Los Gatos road, Orchard City Grange having charge of the ceremonies. Rev. G. E. Atkinson, formerly of Campbell and an old friend of the family, read the sermon and Mr. Amos Williams sang at the house service.

The throng of sorrowing friends and quantities of beautiful floral pieces were the strongest testimony of the love and respect this mother enjoyed in this community. One of the largest corteges that has ever honored a resident of this vicinity accompanied her remains to their last resting place in Oak Hill.

The bereaved husband and children have the deep sympathy of a very wide circle of friends, whose sorrow is alleviated only by the knowledge that she passed away without pain.

Beside the immediate family the deceased is survived by a brother, Calvin Barker, and a half-brother, John Barker, and a half-sister, who were present at the funeral.

Just Folks

By EDGAR A. GUEST

THE ROADS OF HAPPINESS.

The Roads of Happiness are not
The selfish roads of pleasure seeking.
Where cheeks are flushed with haste
And hot
And none has time for kindly speaking.
But they're the roads where lovers stray.
Where wives and husbands walk together
And children romp along the way
Whenever it is pleasant weather.

The Roads of Happiness are trod
By simple folks and tender-hearted,
By gentle folks that worship God
And want to live their days unparted.

There kindly people stop and talk,
Regardless of the chase for money,
There, arm in arm, the grownups walk
And every eye you see is sunny.

The Roads of Happiness are lined,
Not with the friends of royal splendor,
But with the loyal friends and kind
That do the gentle deeds and tender.

There fame has never brought unrest
Nor glory set men's hearts to aching,
There unadorned is life's best
For selfish love and money making.

The Roads of Happiness are those
That do not lead to pomp and glory,
But wind among the joys and woes
That make the humble toiler's story.

The roads that oft we used to tread
In early days when first we mated,
When hearts were light and cheeks were red,
And days were not with burdens freighted.

(Copyright by Edgar A. Guest.)

Determination reduces hard work to nothing; procrastination makes hard work out of nothing.

**CALIFORNIA NEWS
ITEMS IN BRIEF**

**Paragraphs of Interest to
Readers of Golden State**

The location survey of the ditch system of the Oroville-Wyandotte Irrigation district was started last week.

Edward D. Roberts, former State Treasurer and well-known banker, died Thursday night at his home in San Bernardino following an operation for appendicitis.

Thirty-five forest fires were started by a lightning storm which destroyed the forest lookout station on Mount Eddy, near Sisson Thursday, officials of the forest service announced.

Peach cutters are making as much as \$8 and \$9 a day in this section of the county. Women, who are expert in the art of cutting peaches are reported to have made as much as \$5 in the forenoon.

The holdover of tepary beans in the warehouses of the San Fernando Valley has been reduced one-half by the recent shipment of forty-two carloads to Hamburg, Germany.

Opening prices on dried peaches were announced at Fresno Wednesday night by the California Peach Growers at figures which will net the growers about 17 cents a pound against slightly less than 15 cents last year.

The Associated Oil company is supplying more gasoline now than at any time since the company was forced to ration its patrons, stated local manager John R. Chance recently in discussing the gasoline situation.

Apricot growers who are members of the California Prune and Apricot Growers, Inc., will be paid from 18 cents to 33 cents a pound for their 1920 crop of dried apricots, according to prices named by the board of directors of the association.

The farmers of Yolo county are strongly in favor of the prohibition of Oriental and Mexican immigration and ownership of land in the United States, according to a vote just taken at the various farm centers by County Farm Adviser W. D. Norton.

E. G. ("Cannon Ball") Baker arrived in Los Angeles Thursday in an automobile, which he had driven from New York City in six days, seventeen hours and sixteen minutes, breaking his own transcontinental record of seven days, eleven hours and fifty-two minutes.

There is an acute shortage of labor in the Chico section, according to H. L. Miller, manager of the State Employment Bureau there. The greatest demand for help comes from the lumbering industries of McCloud and Westwood, while ranches report a scarcity of help.

The 1919-1920 crop of oranges, so far as the Redlands citrus district is concerned, is almost out of the way. Most of the packing-houses have closed for the season and those that are now open have less than a hundred cars of Valencia oranges among them to ship before the season is over.

A second transcontinental airplane race over a southern route is planned for the winter by the Aero Club of America, pending sanction of the board of governors. The proposed course is from New York to Los Angeles via the Gulf States and the southwest. The first race is to be held in October from New York to San Francisco.

Announcement is made by the college of agriculture of the University of California that the soil tests which have been conducted for many years by that institution, have now been discontinued. Shortage of funds at the State University, it is explained, has made it necessary to curtail all expenditures not considered absolutely necessary.

Population losses for the last decade are shown by three California counties for which census figures were announced as follows:

Amador, 7,793; decrease 1,293, or 14.3 per cent.
Mendocino, 24,116; decrease 187, or 0.8 per cent.

Trinity, 2,551; decrease 750, or 2.1 per cent.

Coalinga, the oil town in the western part of Fresno county, has found its financial condition such that it has been necessary to use drastic measures to curtail expenses. The City Attorney, health officer and caretaker of the autocamp resigned voluntarily, while a dozen minor employees were discharged. The reason for the financial stress is due to the city's purchase some time ago of a gas plant, payments on which have become due.

Shasta county is on the point of embarking on an extensive campaign of bridge building—one that will cost approximately \$100,000.

Dr. Louis Graham of San Francisco will head the California State Dentists' Association during the ensuing year.

The harvesting of what is said to be the largest crop of hops ever grown in the Sacramento valley will begin the last of the week.

The census bureau has given out the returns for Napa county as 20,678. This is an increase over 1910 of 878, or 4.4 per cent.

A city manager for Martinez was advocated recently by members of the executive board of the Martinez Chamber of Commerce who appeared before the board of town trustees.

A remarkable French prune crop, of which better than 30 per cent will be 50s in size, and many of which will run 30s and 40s, is predicted as the prune crop of Butte county this year.

So much business is in sight for the municipal wharf at Richmond that the council, at its recent meeting, decided to place \$150,000 instead of \$100,000, in the coming bond issue.

Mills college has received a special gift of \$350,000 for the endowment fund by the general education board of New York, according to an announcement made from the college.

A brush, feed and grain fire, said to be the worst in the history of San Benito county destroyed twenty thousand acres of feed and brush and several hundred acres of grain.

There are at present 3,498 adult Japanese in Oregon. In the State, 2,815 acres of land are owned by and 7,911 acres are under lease to Japanese. The value of their realty is \$860,000.

After the payment of all charges the Western Pacific Railroad Company announced that for June last, the company had earned a surplus of \$371,530. It is said the showing for July will be equally as good if not better.

The promise that Biggs and vicinity will join with Gridley in a request to be annexed to Sutter county was received here recently from Biggs business men and from ranchers in the district.

A possible increase of 20 per cent in commutation rates across the bay and down the peninsula overshadowed interest in the impending 35 per cent increase in freight rates recently among the workers in the business district.

From all parts of the country the reports are to the effect that labor will be available to harvest all the crops and outside of California the crops, except cotton, are reported as of excellent promise.

The Vallejo City Council took steps last week to employ Attorney James Anderson of Anderson & Anderson, tideland experts of Los Angeles, to represent Vallejo in the proposed litigation to settle the ownership of the tidelands in front of this community.

Farmers of Visalia received \$17 as the top price for their hogs at an auction sale under the auspices of the California Farm Bureau Marketing Association. This was the highest price received here for some months past, according to Manager H. D. Bitner.

Clerks in the United States District Court announce that no first naturalization papers would be received in that department until September 1. The order was posted for the reason the law prohibits the filing of first papers within thirty days before an election.

Eight carriers operating on the inland waterways of the State have applied to the Railroad Commission for authority to put into effect a schedule of higher charges for transporting freight on the ground that higher fuel and labor costs make the present rate unremunerative.

The Friesleben ranch, twelve miles north of Marysville, has been selected as the location of the first airplane factory in Northern California, according to the announcement made by the Friesleben Aircraft Corporation, which is now engaged in building a large plane for passenger service between San Francisco and Portland.

Because of the increased prices for materials the San Francisco-Oakland Terminal Railway Company is turning special attention to its reclamation department. In this department spikes, old bolts and other equipment are made almost like new at a great saving. Already a saving of \$20,000 has been made in this department.

Connecting the principal national parks of the West by a 4500-mile automobile highway, the longest in the world, is the undertaking of the National Park Service, the American Automobile Association and the National Park-to-Park Highway Association, the pathfinding trip for which is in progress.

The first theft of an airplane in California was reported to the Oakland police recently. Police Inspectors George Powers and William Smith of the automobile detail received a card from Government officials in San Diego that James Hennessey, a naval pilot, had disappeared June 24 with a two-passenger Burgess N-9 naval biplane, headed toward San Francisco.

A substantial increase in passenger traffic and commerce between Pacific Coast ports and the Orient, possibly by the end of this year, and perhaps earlier, in the opinion of San Francisco shipping men, is forecast in the allocation to steamship companies on this Coast of fifteen new passenger liners, announcement of which was made Wednesday by the Shipping Board at Washington.

HAVE MUCH ECONOMIC VALUE

Official of Museum of Natural History Tells of Importance of Bats in Jamaica.

Returning recently from the island of Jamaica, in the West Indies, where he spent four months on a scientific expedition, H. E. Anthony, associate curator of mammals at the Museum of Natural History, brought back with him many fine specimens of bats, which are numerous on that and other islands in the West Indies, says the New York Times.

"The only mammals native to the island today," Mr. Anthony said, "are 20 species of bats and one species of rodent. These different bats range in size from small bats, with a wing spread of six inches, up to very large bats, with a wing spread of from 28 to 30 inches."

People in the United States, where bats are comparatively rare animals, have no idea of the variety and abundance of them in such a place as Jamaica, or of the important economic value of the bat. They are either insect eating or feed on fruits. The insect-eating variety are small for the most part, and have considerable value as insect destroyers. They feed on mosquitoes and on a great variety of winged insect life, many of which are obnoxious to man or injurious to agriculture.

AUSTRALIA HAS MUCH IRON

Engineers Report Immense Quantities Available in the Southwest Part of the Country.

Mining engineers have reported to the Australian government that immense quantities of iron ore are available at Yampi sound, in southwest Australia. The estimate puts the amount of ore available—that is, in sight above sea-level—at 97,000,000 tons. The larger quantities are on Koolan island, where the lode rises 600 feet above the water line; the lode is over 100 feet wide, and is traced for nearly four miles, but really extends right through the island. On Cockatoo island the height is 300 feet, the lode running from end to end of the island.

The quality of the ore is exceptional. There is only 1 per cent of silica present and very little sulphur. These analyses compare favorably with the best known iron deposits in the world. Newfoundland (Bell Island) ore is 51.80 per cent metallic iron, with 9.50 per cent silica. The French ores run to 57.23 per cent, the Cumberland (England) to 48.80 per cent, the Spanish (Bilboa) to 50.84, and the Algerian to a mean of about 50.

Bolshevist Stock Farm.

In the Live Stock Journal of London a correspondent relates the observations of an English horse-trainer recently escaped from Russia: "The Bolsheviks went to all the stud farms and divided the stock among themselves. The best stallion in Russia, imported just before the war at an enormous expense, was given to a peasant, who took the horse off to his village in the interior to draw his cart for a few days and then he slaughtered for food. The bolsheviks then started an improved stud farm under nationalist management. They made it up of six stallions and one mare."

Location at Uranus.

The latest calculations, based on the perturbations of Uranus, are stated by Dr. Eric Doolittle to show that the hypothetical planet beyond Neptune is nearly four billion miles from the sun, and requires 283 years to complete a revolution in its orbit. It is much smaller than other distant planets, with a mass only six times that of the earth. This is a secret of its elusiveness, and its discovery is expected to reveal a minute body of only the twelfth or thirteenth magnitude. Search is now being made for this mystery of the skies near Gemini's western border.

Biggest Freezer in World.

The biggest freezer in the world, with a capacity of 50,000,000 pounds, has just been completed and is now in operation at the Chicago plant of a large meat-packing concern. It has been erected for the dual purpose of freezing meat products, particularly for export, and of storing products during the period of heavy production, to insure a supply at all times. The building is ten stories high and was erected at a cost of \$2,000,000.

Golf by Plane.

Two modern touches in golf were introduced at the big professional tournament at Glen Eagles, in Perthshire, recently.

Airplanes, bringing spectators, arrived at regular intervals from Glasgow, 47 miles away, and every competitor wore a distinctive number on his jacket to facilitate recognition.—Daily Mail, London.

A Forfeited Distinction.

"Why don't you write another letter to the paper and sign it 'Taxpayer'?" "I can't conscientiously assume the title. I'm on the delinquent list."

MISS MAUDE YOUNGER

Miss Maude Younger is secretary of the legislative committee for the national women's party of which Miss Alice Paul is chairman. Of independent means, Miss Younger devotes virtually her entire time to speechmaking and lobbying in Washington for the ratification of the suffrage amendment. She spent five years in the college settlement, New York, where she was converted to suffrage through her close contact with the laboring classes.

What He Said.

Paul and Gerald, twins, were visiting their grandmother in a distant city. One afternoon grandmother walked to the nearby grocery, taking Gerald with her, Paul being asleep. The grocer gave Gerald an apple which he silently accepted.

Grandmother turned to Gerald and said: "Now, what do you say?" "Give me one for Paul."

"WELCOME"

To the E-L social, Friday evening, August 13, in the E-L room at the M. E. church. We have some competition across the road, but you will enjoy the laughter, smiles and good times we have provided for all, and if you aren't too serious to have a good time it won't cost you anything.

A little mysterious? Yes, but we don't believe that curiosity ever killed a cat, so come, girls.

WEDDING RECEPTION

The beautiful home of Mr. and Mrs. Blackmore, 270 Santa Clara street, San Jose, was thrown open to a large company of friends on Saturday evening.

The affair was a reception and was planned as a surprise in honor of Mr. and Mrs. Blackmore, who were recently married and who now reside in Campbell.

The rooms were artistically decorated for the occasion with amaryllis, carnations and maidenhair ferns. A handsome set of sterling silverware was presented during the evening to this worthy couple, showing the high esteem in which they are held by their many friends.

Mrs. Blackburn, or "Scotty," as she is familiarly called, is a native of Aberdeen, Scotland, and is a general favorite with all her associates. Mr. Blackburn served for four years in the Canadian army and since his return has been employed in Fresno and Campbell.

During the evening dancing and games were enjoyed, and an original poem, complimentary to the bride, was read by one of the guests and was well received. Dainty refreshments added to the evening's pleasure.

The hostess received many compliments from the departing guests relative to the beauty and hospitality of her home.

Next week will see work at the U. of C. begun in earnest. There has been a great deal of complaint on the part of students and parents over the early closing in the spring and opening in the fall of our state institution, as it deprives the student of an opportunity to earn a large part of their expense money. Those attending other colleges have at least a full month or more of work which means a matter of from one to two hundred dollars. Concerted action on the part of chambers of commerce and other institutions might bring about a change that would be of great benefit to students. Help create a popular demand for such a change by talking of the matter and bringing it to the attention of clubs and other organized bodies.

HIGH PRICES FOR PRUNES

SUNSWET QUALITY, 20-30'S TO BRING A FLAT PRICE OF 25 CENTS A POUND

Prices for 1920 crop prunes, named by the board of directors of the California Prune and Apricot Growers, Inc., assure the prune growers who are members of the association of a her golden harvest, equal in value to the record breaking one they gathered last fall.

These prices, which are the ones which will be paid to all grower members of the association, are three cents a pound higher than last year's prices on 20-30's, from a cent to a cent and a half higher on the next three sizes, the same price as last year for 60-70's and slightly lower on the smaller and less desirable sizes.

On sizes from 20-30's to 60-70's inclusive, which usually comprise about 73 per cent of the crop, the average price for this year's crop is one and a third cents a pound above the price the growers received for these sizes last year.

Prices announced for 1920 crop prunes are:

Sunsweet quality, 20-30's, 25 cents a pound flat.
30-40's, 17 cents bulk basis.
40-50's, 15½ cents bulk basis.
50-60's, 13 cents bulk basis.
60-70's, 11½ cents bulk basis.
70-80's, 10½ cents bulk basis.
80-90's, 9½ cents bulk basis.
90-100's, 9½ cents bulk basis.
Growers' quality was set half cent a pound less than Sunsweet.

**HARDING'S
NEWSPAPER CREED**

(Instructions given to every reporter on the Marion Star)

Remember there are two sides to every story. Get them both.

Be truthful. Get the facts.

Mistakes are inevitable, but strive for accuracy. I would rather have one story exactly right than a hundred half wrong.

Boost—don't knock.

There's good in everybody. Bring out the good in everybody, and never needlessly hurt the feelings of anybody.

In reporting a political gathering give the facts, tell the story as it is, not as you would like to have it. Treat all parties alike.

Treat all religious matter reverently.

If it can possibly be avoided never bring ignominy to an innocent man or child in telling of the misdeeds or misfortunes of a relative.

Don't wait to be asked, but do it without asking, and, above all, be clean and never let a dirty word or suggestive story get into type.

I want this paper so conducted that it can go into any home without destroying the innocence of any child.

Warren G. Harding.

**HARRIS LAW WILL MAKE THE
EIGHTEENTH AMENDMENT
EFFECTIVE IN CALIFORNIA**

The Harris Law is a bill passed by the last legislature designed to make the eighteenth Amendment effective in California. It is a state law so timed as to go into effect January 16, 1920, when National Prohibition went into effect, but the wets brought it under the referendum, and we will have to vote on it next November. As it is now, we have no state law and the enforcement of National Prohibition is left altogether with the Federal officers, without any co-operation on the part of the local police. If the Harris Law is carried, it will make every state officer enforce the law, as they should.

**GRAMMAR SCHOOL
FACULTY COMPLETED**

The complete corps of teachers for the Campbell-San Tomas grammar school has been elected, but assignments to grades will not be made until the return of Mr. Rodriguez. Mr. Rodriguez and Miss Reese of last year's faculty will return, and the new teachers are Miss Mary Fablinger of Campbell, who taught at Coalinga last year and was offered a considerable advance to return; Miss Naylor, who has been a successful teacher in Morgan Hill; Miss Mace and Miss Burgess, who taught last year in Los Gatos.

With the addition of another teacher and this well selected group our combined schools can look forward to a successful year, with the cooperation of the parents of both districts.

SHIRKERS ARE EXPENSIVE

DON'T SHIRK. Not long ago we read of the available supply of a commodity being cut down and the price thereby boosted by limiting of production. Such things make one thoroughly disgusted by the organization that countenances such limitation. Doesn't it make you squirm to have to pay more for your potatoes because some one dumps a few paltry thousand sacks in the river? It does. It annoys you to have to pay more for your manufactured articles because of short production? It does. Then stop to think that when you shirk your work in the cannery you are boosting the price of can fruit to the consumer by making it cost the packer more. It isn't Be square. Don't shirk.

WALLACE THE LOGICAL CANDIDATE

There has been a reversal of conditions in the senatorial contest. The withdrawal of E. A. Meserve of Los Angeles has left only one aspirant in that section of the state, former Lieutenant Governor A. J. Wallace. In the north, on the other hand, there are three candidates: James D. Phelan, incumbent; William Kent, and Sam Shortridge. Kent and Shortridge are contesting for the Republican nomination and are obviously dividing the vote of the north. Republicans of the south, tending that their section of the state is entitled to one of the two United States senators from California, are showing a disposition to support Wallace. Meserve has declared for his former rival, and stalwart Republicans as former United States Senator Frank P. Fosberg, who was chairman of the Johnson delegation at Chicago, are behind the Los Angeles candidate, and Governor Stephens is reported to be favorably inclined. Wallace has announced his use of the name of Harding and Coolidge and has endorsed the Republican platform. While Wallace and Senator Johnson have not been on the closest terms within the past few years, the logic of the situation dictates that the friends of California's junior senator will gravitate into the camp of the Southern California candidate. The mind the complications likely to arise two years hence when Johnson seeks re-election. If both United States senators then hail from the north the situation will present difficulties. In his recent presidential primaries the most spirited fight against Senator Johnson was waged in Los Angeles and while the senator carried the State by a majority of over 150,000 he lost that southern county by over fifteen hundred votes. Johnson's friends figure that his campaign for re-election will be far less difficult if the demand of the south for senatorial representation be appeased now by the election of a candidate from that section. In San Francisco, where Wallace would find it difficult to contest against one candidate, there is a very bitter fight between the Kent and Shortridge forces. There is, however, considerable sentiment throughout the north in favor of according the big southern section of the state representation. It is pointed out that there are many problems in Southern California that are peculiar to that section and very strong arguments can be advanced in favor of giving it a voice in the upper branch of the United States Congress. The refusal of either national political party to make prohibition an issue is likely to work to the advantage of Wallace. Those who look to the enforcement of the eighteenth amendment will support his candidacy although he is not called upon to discuss the issue in view of the attitude of both parties. The "wets" are generally discouraged and have lost interest in who are active are dividing their strength between Kent and Shortridge, whose chief strength will be in San Francisco, which admits it wet. From all present indications Wallace has the edge on the Republican nomination.—Oakland Tribune.

DADDY'S EVENING FAIRY TALE

THE SAND FAIRIES.

"Daddy, I was very angry and we had a talk with him," said one of the Sand Fairies. "He talked about the fact that he had heard of children making sand pies and he felt quite badly for a while. He said it was a pretty pass when children gave up making mud pies or sand pies when mud pies for years and years had been so important and so fine."

"Of course I explained to him that he mustn't feel hurt. He asked me how he could help but feel hurt and I told him that down by the sea the children didn't have mud to make mud pies with and so they used the sand to make sand pies with. He said that was quite different and he didn't feel angry or hurt any more."

"He hadn't realized that by the ocean there was only sand and no mud such as he has."

"And I told him how the children made the sand into sand pies with the aid of old Mother Ocean and he was quite interested, for that is how the children do make the sand pies."

"And such sand pies as they do make—many, many sand pies. And they often put the pies in the sand castles they build so that the sand people they make can have sand pies to eat!"

"But, come, Sand Fairies, all of the rest of you, come and play. The Breaker Boys are very anxious to play hop, skip and jump with us. Mostly they want to play the jump part."

"They want to dash high in the air, and the Spray Grandchildren are all about longing for a great game."

"Old Man Wind is around, old Nurse Fog is too, the White Capped Boys are ready—everyone is ready for a great and wild game."

"We will be washed out and back again, and we will feel the great and wonderful waves dashing over us."

"We will taste the salt taste of our beloved old Mother Ocean and her children."

"We will feel the white, billowy foam going over us."

"Come, Sand Fairies, come all, for we're to have a great Ocean Storm right here on the beach, right along the coast."

"And the people will watch us and will say:

"What a summer day! And they will also exclaim:

"Oh, look at the waves! Aren't they huge! And how they dash over the beach. And over the rocks. How high they are! As high as cottages and as high as houses. And see the Spray!"

"That will rejoice the Spray grandchildren. They love to be noticed too!"

"Come, Sand Fairies, all of you come and join in the great storm."

"And all of the Sand Fairies said that they were ready."

The Breaker Boys ran races as they dashed in over the beach. The Spray Grandchildren rose high in the air, tossed up on the shoulders of the Breaker Boys.

Old Mother Ocean laughed and chuckled in her great deep roaring voice and the White Capped Boys whispered wildly to old King Foam:

"Stay around, stay around, we need you and we love you!"

And old Man Wind roared and blew and said:

"This does my windy heart good. I am delighted with this. I am simply delighted with a storm like this."

"It makes me feel so fresh and strong and well. It is good for the wind to exercise!"

And the Sand Fairies laughed with glee, and said,

"Ah, what fun this is, and how nice it is that there are so many of us to enjoy a storm such as the dear old Mother Ocean and her friends are giving us now."

"And while the children are looking at the storm we wonder if there are any of them who know what a great lark all the Ocean family and friends are having today, what a great and glorious game!"

"We believe they do for they're admiring us and not grumbling about the weather. They understand we're having a party, a most wonderful party."

"Yes, they understand their friends the Sand Fairies, and they know that they're having fun, great fun!"

Ice Like a Burglar.
Why is ice like a burglar? Because it holds you up.

C. E. meetings at 6:30 Sunday evening. Young people are cordially invited to attend.

Mr. and Mrs. Warren McKenzie are here for a short vacation with his mother, Mrs. Henry Campbell.

Mr. and Mrs. D. H. Cramer are expected to arrive Saturday from Pomona, the last stop of their trip.

Mr. and Mrs. Charles Townsend came from Hollister and were welcome visitors in Campbell this week.

Miss Marion Copeland of San Francisco is the guest of her cousins, Mrs. Emily Gard and Mrs. Irene Bohnett.

Elgin Hurlburt, Jr., is up from Pacific Grove for a month of work in the fruit harvest before returning to the school joys.

"Beer and Light wines" will be R. H. L. Preston's eleven o'clock subject next Sunday morning at the Congregational church.

The Ralston Alison, W. H. Alison, Lail, Luchart Siler and Gordon Luchart families held a Missouri delegation picnic dinner at Alum Rock Park last evening.

C. E. Burke came from Turlock Sunday to take his family home. They went to their Turlock ranch Wednesday where they will remain through the coming school year.

Miss Dorothy Ainsley and Miss Adri Eaton returned the first of the week from an outing at Ben Lomond at the Ainsley cottage. Miss Eaton has returned to San Jose to resume her duties.

O. Strom has sold his large bungalow on Campbell avenue to Dr. G. E. Stallman who will probably occupy his new home early in September. Mr. Strom will later build another residence for himself.

Mr. and Mrs. J. A. Price and daughter Ruth were in Campbell from Sunday to Wednesday visiting at the home of S. L. Hayes before Mrs. Price's brother, Jesse Hayes, leaves for China, to which country he sails on the 17th.

Mrs. Hattie Baugh has purchased a lot of S. G. Rodeck on North Second street and S. L. Hayes will erect a six room bungalow, beginning work immediately. Mrs. Baugh and children have been occupying the D. H. Cramer residence.

Wm. O'Neil has the contract for the house to be erected by Mr. Bader on his orchard property on North Second street. This, with the bungalow which S. L. Hayes will build for Mrs. Baugh, will add to the number of attractive homes in Campbell.

Cloyd Barker went to Los Angeles this week to join his father, E. A. Barker, who is interested in the moving picture business there, he with other relatives controlling the Kewpie Doret Co. Mrs. Barker will join her husband after attending to business matters here.

C. Erwin Richter, Campbell's big representative on the rugby team at the Olympic games in Belgium, sailed from New York with the team aboard the transport Sherman on August 5th. As a last warm-up before sailing they trimmed a team of former rugbys 47 to 0.

While on his way to Yellowstone Park, Dad Sturtevant spotted some fine venison on the Placerville-Tahoe road and he straightway began to dream dreams and plan plans for the hunting season. He, with Elwood, has now hied himself to that spot with an eye for game.

The lights on Campbell's streets were turned on Monday evening after a period of some months of Stygian blackness except when fair Luna shed a few beams of light. The new contract calls for different lights and locations, but until such time as the changes can be made we welcome the old.

The C. E.'s will hold an outdoor social at the Congregational church this (Friday) evening, providing the canneries are not running, as this is planned particularly for the out of town young people who are here for the season. Any such are cordially invited to come and have a pleasant evening.

Union Precinct 1—Polling place, We and Our Neighbors Clubhouse. Inspector—Carrie A. Davis. Judges—Evelane M. Grant, Florence M. LaMontagne. Clerks—Curtis E. Hanger, Caroline T. Farwell, L. F. Sherlock.

WHAT ARE YOUR CHILDREN DOING?

Monday afternoon the fire department responded to a call which was found to be in some sheds and grass on the vacant lot next the Congregational church.

If it had made any headway before discovery there was fertile territory for a very serious fire, its sparks from the auto shed belonging to the church would have endangered that whole block.

It was reported to be the oft found combination of children and matches, though we were given no names. Parents cannot always know what their children are doing, but just now there is a very pleasant and profitable place provided for them—the supervised playground at the school. If parents do not wish to send their boys and girls there they should not be running at large as some are doing, especially while so many homes are alone through the day. A number of people have complained of their fruit trees and berry vines being molested and other damage done by children who ought to be busy somewhere.

Mrs. J. S. Morgan, mother of Mrs. R. A. Holmes, was taken home from O'Connor sanitarium Sunday after a serious operation. She is greatly improved and steadily regaining her former strength.

In the list of candidates for degrees to be granted by Stanford in October, there appears the name of Gordon W. Mapes of Palo Alto, from the economics course. Gordon will be remembered as a graduate of C. U. H. S., who made his home with Mrs. Moore on Hamilton avenue. He was one of the members of Uncle Sam's army, being enlisted in the aviation.

Campbell colony at the University of California will be augmented this year by the addition of four new students—Miss Stella Leviston, who graduated from Mills College last spring and is taking advanced courses, and Misses Dorothy Martin, Alice Wiesendanger and Isabel Collins. Those previously registered and who will return are the Misses Delpha Wiesendanger, Catherine Cooper, Harriet Dunphy, Elizabeth Duncan and Ruth Metzler.

The deal was closed Wednesday whereby Robert Holmes secured the title to a 35-acre peach orchard three miles from Patterson. The tract formerly belonged to Mrs. Nickerson and is now in full bearing with seven year old Phillips clings. It is well located in the irrigation district and level enough to be easily watered. Mr. Holmes does not expect to leave Campbell for some time and will continue as foreman at the Hyde cannery. They have practically been assured of a house to move into as soon as they leave the one they have recently sold.

FOR SALE—Skinner Seedlings, \$1.25 a box. Will deliver in Campbell. Mrs. Clarence Davidson. Phone Campbell 28F3.

CANDIDACY OF JOHN G. JURY FOR JUDGE OF SUPERIOR COURT

John G. Jury was born in the state of Michigan and has been a resident of Santa Clara County, California, for more than thirty years. He is of unimpeachable character as a citizen and of recognized ability and integrity as a lawyer.

He is the author of "Adjudicated Forms of Pleading and Practice" (2 vols.) in daily use by thousands of lawyers in all code states and territories. Author and editorial writer for the largest law book publishing houses, east and west. During the past fifteen years, and in conjunction with practice, he has contributed for standard law books and publications now in constant use by lawyers generally in all states and territories, articles on the following subjects: Pleadings, Trials, Evidence, Judgments, Juvenile Courts, Probate Procedure, Executions, Negotiable Instruments, Partnerships, Taxation, Liens, Common Carriers, Cloud on Title, Covenants, Mines, License, States, Homestead, Robbery, Criminal Trials, and important annotations to all California Codes—Civil Procedure, Civil, Penal, and Political, and many other law topics.

He has been in active practice for more than twenty-five years in County, State, Federal and Foreign Courts, and the results of his learning and extensive experience are embodied in his works.

He regards human values as of supreme importance, is concerned in child welfare, and the general uplift of humanity. He stands four-square for American principles and would administer equal justice to all.

He served during the war as a Four Minute Man and enlisted in the Public Service Reserve. He is a ready speaker with the courage of his convictions, or, in other words is not afraid to act or speak as he thinks because it might be turned to his political disadvantage, for he has not sought public office in twenty-five years and therefore is not a politician in the sense in which that word is so often used.

Voters are becoming more self-reliant and studying political situations and candidates and are voting with the view thus obtained. The best Americanism

Kent For Senator

MR. VOTER:

Perhaps in the past you have been prone to say "What's the use of voting; our representative in Congress represents special interests only."

If you elect Wm. Kent a member of the United States Senate YOU will have a representative. Look up his past record for confirmation of this statement.—Adv.

NOTICE OF ELECTION

Notice is hereby given that a special election for School District Tax for Campbell-San Tomas Union School District will be held at the Campbell Grammar School, August 16, 1920, from 1 o'clock to 5 o'clock p. m. for the purpose of raising \$2700.00 for maintenance, transportation and other necessary expenses.

Dated July 29, 1920. T. A. ROBINSON, Clerk

STURTEVANT'S QUALIFICATIONS

Judge George A. Sturtevant is a graduate of the University of California; he was four years district attorney of Mendocino county; later he was nine years an assistant to the Attorney General of California; and he is now, and has been for the last thirteen years, a Judge of the Superior Court in San Francisco. He has the qualifications and should be elected Associate Judge of the District Court of Appeal.—Adv.

is to put in office the men best qualified. Scholarship, morality, ability, and courage are good qualities to have in a candidate for the highest office a county can offer. Adv.

Rann-dom Reels

By HOWARD L. RANN

THE TRAINED NURSE.

THE trained nurse is a ministering angel who is hired to let other people sleep.

There are two people who have proven that the world would be better off if sleep had never been invented. One of them is Thomas A. Edison and the other is the bright-eyed trained nurse who can sit up all night for a week and look as fresh as a plate of home-grown lettuce. Mr. Edison has not used any sleep to speak of in his business for years, and his close friends and associates say that when he feels any coming his way he holds his head under the cold water faucet until the attack passes.

When a nervous, high-strung business man comes down with an ulcerated tooth which hangs on like a one-armed man at a club dance he refuses to allow any sleep to enter the house, thus making it necessary to engage a trained nurse who is accustomed to sit bolt upright for weeks at a stretch without uttering a blink of any kind. There is nothing more soothing than the entrance of a graduate nurse and

"A nervous, highstrung business man with an ulcerated tooth which hangs on like a one-armed man at a club dance."

her soft-roll shirt waist into a home from which sleep has been banished by an able-bodied husband who has the galloping toothache and wants everybody in the block to know it. This enables a wearied wife to drop at full length into a leather chair and sleep until she has a crick in the neck which follows her around for several days.

The trained nurse is obliged to obey the doctor's orders and feed the patent medicine and run a spirit thermometer down his throat at regular intervals. As the average patient, particularly of the male sex, soon develops a temper that would raise blisters on a tin roof, she is obliged to mix tact with the medicine and sometimes a little brute force. It must be admitted that the trained nurse earns her money and gets it.

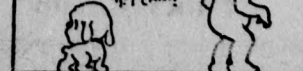

NOVEL SILKS IN SKIRTS

A new and fascinating chapter in the story of separate skirts has been offered by the employment of wonderful new weaves in silk for making them. The knitted weaves, in plain and mixed colors, heavy and very brilliant satins, tricolettes, are all produced in beautiful patterns of one or two colors showing huge checks, cross-bars, plaids and mixtures. In the picture a blue and white, in a rough weave with brilliant luster, makes a skirt of utmost elegance.

THE CHEERFUL CHERUB

When wide and silent
lies the snow
And clear the cold
stars glisten
I feel a whisper
through the air
And
breathlessly
I listen.

MOSAIC DISEASE OF SUGAR CANE

Federal Agricultural Department
Taking Measures to
Stamp It Out.

PLENTY OF HEALTHY STOCK

If Unchecked Disease May Do Incalculable Damage to Great Cane Growing Sections of the South—Must Use Pure Seed.

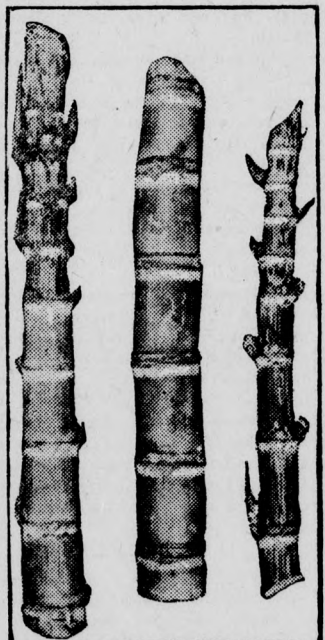

(Prepared by the United States Department of Agriculture.)

Washington.—The United States department of agriculture is issuing a bulletin containing several colored plates illustrating the mosaic disease of sugar cane, which should enable those interested in this disease of cane to identify it. The mosaic disease of sugar cane which has been known for several years in a number of other cane countries has recently been found in the southern United States. While this disease is quite widespread in the states, there are many disease-free areas from which clean seed cane may be obtained.

The mosaic disease, which has done considerable damage to the cane crop in Porto Rico and some other cane countries, is one of the most serious maladies that has confronted cane growers in recent years, and if unchecked may do incalculable damage to the great cane-growing sections of the South.

To Eradicate Disease.
The measures of control now being taken by the federal authorities in co-operation with various local agencies were preceded by a complete survey of the Southern states undertaken to ascertain the extent of the infected areas.

In badly diseased fields the only remedy is to grind up all the stalks, say the representatives of the department of agriculture. This means, of course, that carefully selected seed cane must be brought in from other regions for replanting. There is still an

Late Canker Stage of Mosaic Disease on Canes of New Caledonia Variety. Cane in Center Is Healthy.

abundance of healthy stock in Louisiana and the other cane states, so that the industry should not seriously suffer from these attempts at eradication. Where the disease has not obtained a strong foothold, roguing is recommended. This consists of pulling up infected plants, root, stem and branch, and throwing them down between the rows. As soon as the plants wilt they are no longer dangerous as a source of infection. In damp regions, however, care must be taken to gather up these plants and burn them or otherwise destroy them, lest while lying on the ground they sprout and so spread the disease.

Appearance of Mosaic Disease.

It is difficult to describe the appearance of sugar-cane mosaic verbally, and this is one of the reasons why the federal authorities are using a bulletin with colored illustrations. By means of this bulletin anyone can readily ascertain the exact appearance of infected plants: This disease is an infectious chlorosis, similar in many respects to the mosaic disease of tobacco, cucumber, bean, tomato and potato. Scientists have come to the conclusion that some virus is responsible for the appearance of all new cases, and that the only source of infection is some other infected plant. Experiments in Porto Rico and elsewhere have repeatedly demonstrated that cuttings from infected stalks will invariably give rise to infected plants. The shoots seem to be mottled as soon as they appear. Therefore, the use of diseased stalks for planting results in a wider distribution of the disease and insures the survival of the virus even in the absence of secondary infections.

Beats Indigestion.
Los Angeles, Cal.—Battling the high cost of living and an aggravated case of stomach trouble, Miss Grace M. Miller fasted 32 days, beat H. C. L. to a standstill and cured herself.
